

### **OEM - ORIGINAL EQUIPMENT MANUFACTURER**

Even individual customer requirements (OEM) can be realised with professionals and a state-of-the-art machine park. In addition to CAD systems and the traditional production of prototypes in the pattern shop, 3D printers and plotters are increasingly being used to complement the design and technical implementation by the designers and engineers in synergy.

First samples are often handmade, and it is one of the tasks of our chain technicians to develop tools and machinery for these samples, so that the production of new OEM products can be done by machine. With Schofer, you have now three options to personalize chains with your brand name or logo: either by a very precise automated laser engraving or by rolling the wire, individual or all chain links of the chain can now be personalised. The branding can also be done on the clasp. Additionally little logo plates in various shapes and sizes contribute to the personalisation.

**Trade Shows 2020:** Vicenzaoro January | IJS Hong Kong | Oroarezzo | JCK Las Vegas |  
Vicenzaoro September | JGF Hong Kong

### **SCHOFER - THE RELIABLE SOURCE FOR ALL CHAIN REQUIREMENTS.**
