The use of aisle space for demonstrations, selling merchandise, or distribution of pamphlets and advertising material is prohibited. All sales and promotional activities must be confined to your exhibit space.

complied with this regulation in the past have created major electrical problems for neighboring companies. It will be enforced vigorously.

The proper license must be posted in your booth and available for inspection at the request of Show Management or properly authorized agents of ASCAP or BMI. We advise you to contact these agencies as listed below to acquire the proper licenses:

Tel: 212-621-6000      Tel: 800-925-8451, 615-401-2000

**Adherence to these federally mandated copyright licensing laws is of critical importance. Failure to do so is both a violation of federal copyright law and a breach of your contract for exhibit space for JCK. Please take a few minutes to ensure a hassle-free event by acquiring the proper licenses. If you encounter any difficulty with either ASCAP or BMI in your attempt to acquire a license, please contact us immediately.**

Aisles may not be obstructed at any time. Equipment, product or machinery, when displayed to demonstrate or simulate industrial application, are exempt from the foregoing height limits, but are restricted only by ceiling height, as well as building and safety codes.

---

Exhibitors of 1,000 sq. ft. or larger are no longer required to obtain a permit from Clark County Building Department (CCBD); however, they are still required to have an engineering structural integrity stamp of approval – please have a copy available in your booth if this pertains to your exhibit size.

**ELECTRICAL:**

If an exhibitor will not be using any showcases for their booth, they are allowed to use the allocated electricity for their other materials. However, they must hire SES labor to connect it to their desired equipment and pay them directly. The electrical drops do not have standard plugs to prevent unauthorized use, so labor must be hired to assist with this task.

All electrical work will be done exclusively by the SES electricians. Please refer to the SES Electrical order form located on the [Venetian Expo Exhibitor Services site](#). SES is the provider of electrical services. Please refer to them if there are any issues on-site.

The exhibitor will be charged for the removal and disposal of these items. Charges may include Installation & Dismantle Labor, Forklift/Rigging Labor, and/or Dumpster Fee.

---

**EXHIBITOR APPOINTED CONTRACTORS:**

An Exhibitor Appointed Contractor (EAC) is a company or contractor hired by the exhibitor, who is not an employee of your company or of an official show contractor. EACs are most often independent installation & dismantle companies but also include supervisors, technicians, photographers, audiovisual, floral, furniture, flooring, and any other contractors who aren't the official contractors of the show but provide a necessary service at show site for the Exhibitor.

**EXHIBITOR SERVICE AREA:**

Freeman will maintain a service center during set-up, show days and dismantling. All other official Show contractors will also be set up in this area as well. Refer to the [Freeman Quick Facts](#) for hours of operation.

All inquiries regarding booth services and orders should be made at the Exhibitor Service Center, including booth furnishings, labor, freight, and special show services. **Exhibitors who have ordered labor must check in at this desk when they are ready to install their exhibits.**

The person in charge of your exhibit should carefully inspect and sign for all work order forms. If you disagree with a bill presented for your signature, question it immediately. If you cannot come to a satisfactory agreement with the contractor, contact Show Management. Do not put it off. Once the show has ended, it becomes very difficult to resolve issues.

Two people must be with the vehicle - one to accompany the product to the booth and one to remove the vehicle from the area.

Two-wheel luggage/suitcase is acceptable; hand carry does not include the use of four-wheel dollies, two-wheel dollies, or push carts. These tools are prohibited and cannot be used to transport any hand

carry material during the move-in and move-out of the trade show by an exhibitor or their exhibitor appointed contractor (EAC).

#### **IN-BOOTH SAFE PROGRAM WITH ROLLAND SAFE:**

Exhibitors are vulnerable to theft and loss in the trade show environment. A rental safe provides the added security and convenience of allowing you to securely store valuables on-site instead of packing them after show hours and transporting them to a remote secure storage area.

Rolland rents high security safes to protect exhibitor property before, during and after show hours. Rolland personally coordinates with JCK to address all safe-related logistics, installation and post-show de-installation. We also provide exhibitor customer service to ensure that all of your needs are addressed. [View In-Booth Safe Program.](#)

If you have any questions about the Rolland In-Booth Safe Program, please contact Gicela Gonzalez at [saferentals@rslc.net](mailto:saferentals@rslc.net).

#### **JEWELRY DISPLAY REGULATIONS:**

JCK is a "FULL DISCLOSURE" show. The following regulations have been established to maintain the quality and integrity of the products displayed at JCK.

All Exhibitors must be in compliance with the Federal Trade Commission (FTC) Guides for the Jewelry, Precious Metals and Pewter Industries and with the National Gold and Silver Stamping Act as they relate to specific products.

The guides contain regulations regarding the content, weight and use of terms as they relate to precious metals, gemstones, pearls and watches. Violations of the guides can result in cease-and-desist orders or civil penalties. The National Gold and Silver Stamping Act requires all quality marked precious metal items to be stamped with a valid trademark to readily identify the manufacturer of the item. Violations of this federal law can result in civil or even criminal penalties. If you are unfamiliar with the provisions of either the FTC Guides or with the National Gold and Silver Stamping Act, please contact the Jewelers Vigilance Committee (JVC) at (212) 532-1919 to order a copy of these important documents. Your knowledge of and adherence with these laws will help maintain the consumer trust and confidence

upon which the industry depends. Specific information regarding gemstone treatment disclosure is also available through the AGTA.

All gemstone treatments (other than cutting and polishing) and including laser drilled or fracture filled diamonds, heated sapphires or aquamarines, irradiated topaz or oiled emeralds, etc., must be disclosed at every level of sale within the industry and eventually to consumers. Disclosure of such treatments in an honest and straightforward manner is our ethical and legal responsibility to the industry. Without reliable information from gemstone suppliers and jewelry manufacturers, retail jewelers cannot pass accurate information along to consumers, as law requires them. A lack of disclosure, particularly of difficult-to-detect treatments, may lead to misrepresentation and a lack of consumer confidence in our industry.

If you are a manufacturer of jewelry that contains diamonds, pearls, colored gemstones or synthetic stones, important disclosures must be made at every level of sale. If you are not receiving treatment disclosure information from your gemstone suppliers, demand it. If you are not conveying this information to your customers, please be advised you must.

A complete explanation of gemstone treatment disclosure is available in the Gemstones Enhancement Manual (GEM), which was developed by a coalition of industry leaders representing the various trade organizations, gemological scientist and the trade press.

The coding system detailed in the GEM Manual has been endorsed by the following organizations:

AGS	American Gem Society
AGTA	American Gem Trade Association
DCA	Diamond Council of America
MJSA	Manufacturing Jewelers and Silversmiths of America
JA	Jewelers of America
JIC	Jewelry Information Center
JVC	Jewelers Vigilance Committee
ISA	International Society of Appraisers

If you are a member of any of these groups, you can contact them to receive a copy of the GEM Manual.

LIFTING POSTURE:

CORRECT POSTURE

INCORRECT POSTURE

## Manual handling

Performed incorrectly, manual handling can put stress on the body and cause serious injury. The hazards involved occur when a person is required to lift, lower, push, carry or otherwise move, hold or restrain a load.

How to avoid a manual handling injury when lifting:

1

Plan and check for dangers to yourself or others. Is the destination of the load clear, free from obstruction and within reason?

2

Check your balance and position. Is the load stable, within your weight limits and easy to grip?

3

When lifting items use your legs. Do not jerk when lifting, keep the movement smooth and take a rest if needed.

4

When moving your load, move from your feet. Do not twist and keep the heaviest part of the load against your body.

5

Ensure that others can see you. If required, wear your personal protective equipment (PPE).

### Injury may result when a person:

- Sustains or holds an awkward posture.
- Uses repetitive or sustained force.
- Uses high or sudden force.
- Performs repetitive movement without breaks.
- Lifts weights above their limit.

### As an employer you must:

- identify hazards.
- eliminate the risks wherever possible.
- minimise the risk by implementing control measures.
- maintain control measures and update procedures frequently so they remain effective.
- constantly review risk control measures.
- seek professional advice to avoid any potential injury to staff and costly claims.

### As an employer you must:

- ensure you are aware of, and follow all policies or procedures your employer has in place.
- take reasonable care for your own health and safety and do not place other workers at risk by your actions.
- use correct lifting procedures
- use mechanical aids or team lifting
- comply with any reasonable instruction given by your employer or manager.
- be proactive in identifying and reporting potential hazardous manual handling tasks.
- notify your manager immediately of any injuries or illness.

**MATERIAL HANDLING AGREEMENTS/ SHIPPING INFORMATION:**

All freight that is to be shipped from the **Venetian Expo & Convention Center** must be accompanied by a Material Handling Agreement unless you have small pieces which you intend to hand carry. You must have your exhibit completely dismantled and packed before returning your completed Material Handling Agreement to the FREEMAN Service Desk.

---

**MATERIAL HANDLING (DRAYAGE) SERVICES:**

**NO FREIGHT AISLES:**

All items left in "NO FREIGHT" aisles during move-in and move-out will be moved into the booth by the Official Service Contractor, to avoid delays and ensure a timely move-in and move-out process. "NO FREIGHT" aisles are required by Clark County Fire Rescue Division and will be clearly marked.

---

**NON-OFFICIAL CONTRACTORS:**

Management has taken the time to research and select preferred vendors or contractors for the services you will need to purchase surrounding this event. Not all these necessarily will offer the lowest overall cost, but rather superior service at a fair cost.

Towards this end we ask you to be very careful in the selection of non-official contractors. Include in your costs such items as extra labor, drayage/freight, etc. into the price quoted.

Remember and take into consideration that only official contractors have service desk representation at show site, are allowed early move-ins, late delivery access, work areas on the show floor, etc.

Also, in the event you have a problem of any type with a non-official contractor, we as show management have no recourse whereas a problem with an official contractor can be addressed much more easily and professionally.

If exhibitors are found distributing bags outside of their given booth area, they will be subject to applicable sponsorship fees. It is important that the bags do not mention the word jewelry, feature present or future show

This alerts the general public there is a jewelry show in town. The buyer carrying the bag also becomes a potential target for thieves when outside the show.

#### **SHOWCASES:**

An electrical connection fee of \$25.00 per showcase has been negotiated by Reed Exhibitions to insure a smoother move in for our Exhibitors. This fee covers the following:

All labor involved will be performed by and be the responsibility of SES Electrical Services, hired by Reed Exhibitions. Exhibitors are advised that American Fixture is not permitted to and will not be involved with the electrical connection of the showcase(s) and the Exhibitor agrees that Levin shall have no liability with respect thereto. This coordinates two services so you won't be delayed on your move-in. **Please contact SES with any electrical issues on-site.**
- In order to ensure that the electrical cords are hooked up properly, American Fixture will place the cases in the proper position as directed by the Exhibitor Layout. A LAYOUT MUST BE SENT TO AMERICAN FIXTURE WITH YOUR SHOWCASE ORDER TO ACCOMPLISH THIS.
- This fee does not include electrical power in excess of the 1000-watt outlet supplied with your booth. If additional power is needed it must be ordered from SES. Reed Exhibitions reserves the right to have SES install extra power if needed and invoice exhibitors directly.
- By placing an order with American Fixture, the Exhibitor is authorizing the above service. If additional power is needed, SES will install the power and place the charge for this service on the Exhibitor's invoice for electrical. Electrical charges over the 1000 watts provided with the booth are the responsibility of the Exhibitor.
